

# Functional Approach to Vocation

A 4-phase functional approach to retraining and returning to the job market, this adaptable programme can be used in its entirety or in any combination of phases that would suit the injured person.

This intervention is dependent on access to other services but can typically take between 3 – 18 months to complete.

## Phase 1 / £3,500.00

*Functional skill and vocational capacity assessment, a longitudinal assessment process which allows the injured person to fully experience what they can and can't do.*

## Phase 2 / £3,500.00

*Work hardening phase, the use of daily activities routines and local community services to enable the injured person to build physical and mental strength to join a workforce.*

## Phase 3 / £3,500.00

*Retraining phase, practical support to enable the injured person to receive suitable retraining via community and statutory services to enable skill acquisition.*

## Phase 4 / £3,500.00

*Graded return to work, practical support for the injured person to return to the workforce, this is provided at home and within the workplace to ensure and maintain success.*
